Recommendation letter: Lode Bisschops

Tuesday 19th of April 2022

Ir. Glenn De Witte
Data Science Manager at FibriCheck
glenn.dewitte@fibricheck.com
Alfons Smetsplein 3H bus 00.01
3000 Leuven

This recommendation letter reflects my appreciation for the outstanding job Lode did as a job student for FibriCheck.

Lode worked on providing Business Intelligence insights in the form of dashboards for internal stakeholders, among which our c-level management. During this process, Lode showed how to efficiently translate his skills learned at school to a business context, by working efficient, independently and showing commitment. Apart from the technical ability to create dashboards, he also showed a thorough understanding of FibriCheck's data model. This eventually led to Lode creating a data mart for BI insights, meaning he independently set up a process to create data aggregates to make more useful and faster-loading dashboards.

I am convinced that Lode's work at FibriCheck shows only part of the skills Lode acquired during his studies at KU Leuven. As a Data Science Manager I am impressed by his achievements, as we all are at FibriCheck. Based on his skills, work ethic and overall dependability, I would definitely recommend him for a job as Data Engineer or Data Scientist.

If you have additional questions, please do not hesitate to contact me.

Yours Sincerely,

Glenn De Witte
